

Dear Sirs; I am voicing my opinion regarding NAB's petition #04-160. How dare they infringe on my right to PURCHASE the XM radio programing I enjoy. To be short about it, I get very little time to listen to any radio and I made a conscious decision to get the most from my listening time by subscribing to & purchasing the XM Signal and avoiding countless hours of ADVERTISEMENTS which do not give me the NEWS I listen for.

If the NAB is loosing listeners to XM then maybe they should listen to their own broadcasts of ten minutes of advertisements for every 20 minutes of air time.

I personally blame you, the entire FCC for not limiting the ammount of trash YOU allow the networks to shove down our throats and I also blame the Cable and Satellite companies for not demanding more BEEF and Less BS on both my radio and Television viewing.

If there is ever a machine that will allow me to DELETE commercials I will pay dearly for it.

XM has provided me with exactly what I want, when I want it and I do not have to suffer thru endless commercials.

Your interference here will not go unnoticed.

You have Finally started ridding my airways of the trash the NAB promotes, Howard Stern and Janet jackson to name a couple and I applaude you for this but I will not appreciate your interference with MY XM programing.

You might suggest to the NAB that commercial free broadcasting is a wave of the future and John Q. Public is willing to pay for it as evidenced by XM's popularity.

My vote is in favor of XM-TV where I could watch an entire one hour show in 30 minutes with out commercial interuption or INTRUSION!

Please send the NAB packing and vote NO on 04-160.

Thank you. Gary Lothrop
